JAS. RODGERS, P. M.

Want of Sleep.

Opium or morphine is usually prescribed as a soperific. Both are violent remedies, and re-act violently; producing nausea, headache and prostration. They are often given when they are not needed; and not unfrequently they increase the irritation of the brain instead of soothing it. Probably in seventy: five cases out of a hundred in which they are administered, Plantation Bitters given in moderate doses and at proper intervals, would have the desired effect. Persons who find it difficult to compose their minds to sleep after lying down at night, or whose slumbers are disturbed by bad dreams, or are too brief to afford due nourishment, are advised to try the Plantation Bitters as an anodyne; for this comprehensive medicine is not only a tonic and alterative, but a delightful sedative-a "balm of hurt minds" as well as a revivifier of enfeebled frames.

Its use, as a means of producing healthful sleep, involves none of the unpleasant secondary consequences of a resort to the former narcotics. They all, without exception, excite the stomach; while the effect of the Bitters is to tone, and without irritaing that sensitive organ.

Sea Moss Farine from pure Irish Moss, for Blanc Mange, Puddings, Custards, Creams, &c., &c. The cheapest, healthiest, and most delicious food in the world. For sale by JOHN L. HUDIBURG.

SPECIAL NOTICE. Dr. SCHENCK advises Consumptives to go to Florida in Winter. Dr. SCHENCK advises Consumptives to go
to Florida in Winter.

Having for the last thirty-five years devoted my whole
time and attention to the study of lung diseases and consumption, I feel that I understand fully the course that
cught to be pursued to restore a tolerably bad case of diseased lungs to healthy soundness. The first and most
important step is for the perient to avoid taking cold, and
the best of all piness on this continent for this purpose, in
winter, is Florida, well down in the State, where the temperature is regular, and not subject to such variations as
in more Nerthern latitudes. Palatin is a point I can recommend. A good hotel is kept there by Peterman. Last
winter I saw several persons there whose lungs had been
hadly diseased, but who, under the healing infuence of the
climate and my medicines, were getting well.

One hundred miles further down the river is a point
which I would prefer to Palatin, as the temperature is
more even and the air dry and bracing. Mellenville and
Enterprise are located there. I should give a decided
preference to Mellonville. It is two miles from river or
late, and it seems almost impossible to take cold there.
The tables in Florida might be better, and potients complain at times, but that is a good sign, as it indicates a return of appetine, and when this is the case they generally
increase in flesh, and then the lungs must heal.

Jacknouville, Hibernia, Green Cove, and many other
places in various parts of Florida, can be ackly recommended to consumptives in winter. My reasons for saying
so are that patients are less liable to take cold there than
where there is a less even temperature, and it is not necessary to say that where a consumptive person exposes himself to frequent cells he is cortain to die shortly. Therefore my advice is, ge well down into the State—cut of the
reach of pravailing east winds and fogs. Jacknowille, or
almost any other of the localities I have named, will benefit those who are troubled with a torpid liver, a dis

slimost any chara of the localities I have named, will considered stomach, dernaged bowels, sors throat or cough, but for those whee lungs are diseased a more Southern point is carnestly rocommended.

For fibren years prior to 1869, I was professionally in New York, Boston, Baltimore and Philadelphia every west, where I saw and examined on an average five hundred patients a week. A practice so catanaive—subracing every poesible phase of lung disease—has enabled me to understand the disease fully, and hence my caution in regard to taking cold. A person may take wast quantities of "Sohenok's Fulmenic Syrup, Seawed Tonia, and Mandrake Pills," and yet die if he does not avoid taking cold. In Frerida, nearly everybedy is using Schonek's Mandrake Pills, for site climate is more likely to produce bitions habits thansmore Nerthern intitudes. It is a well-established heet that natives of Florida rarely die of consumption, especially those of the Southern part. On the other hand, in New England, one third, at least, of the population die of this terrible disease. In the Middle States it does not prevail so largely, still there are many thousands of cases there. What a vast percentage of life would be asked if connumptives were as easily alarmed in regard to asking fresh sold as they are about scariet fever, small port, &c. But they are not. They take what they town a little cold, which they are credulous enough to believe will work off in a few day. They pay no attention to it, and hence it lays the foundation for another and another selling the length are disclosed beyond the there will do they be a failed of the lungs are disclosed beyond the handware Fills and go to Florida. I recommend these particular medicines because I am thereoughly acquainted with their action. I know that where they are used in strict accordance with the lungs are disclosed beyond the patient of the work that is required. This accomplished, nature will do the work that it required. This accomplished, nature will do the vort. The physician who p

alght, and you may then drink water and eat watermelous, pears, appies, plums, peaches or corn, without the risk of being made sick by them. They will protect those who live in damp situations against chilis and fevers. Try them. They are perfectly harmless. They can do you good only. I have abandoned my professional visits to Beston and New York, but continue to see patients at my office, No. 15 N. SIXTH Street, Philadelphia, every Saturday, from 9 A. M. to 3 P. M. Those who wish a thorough examination with the Respiremeter will be charged five dollars. The Respiremeter declares the exact condition of the lungs, and patients can readily learn whether they are curable or not. But I desire it distinctly understood that the value of my medicines depends entirely upon their being taken strictly according to directions.

In conclusion, I will say that when persons take my medicines and their systems are brought into a healthy condition thereby, they are not so liable to take cold, yet no one with diseased lungs can hear a sudden change of atmosphere without the liability of greater or less irritation of the bronchial tubes.

Full directions in all languages accompany my medicines, so explicit and clear that any one can use them without consulting me, and can be bought from any drugglet.

MANUFACTURER

Located in the very centre of the metal interests of the United States, with offices and correspondents at the leading cities of the East, West, and South, we do not err in cl ming that it is the Representative Jour-nal of the Metal Manufacturers, Workers, and Dealers of this Country.

THE IRON WORLD AND MANUFACTUR-ER has a large and extended circulation throughout the United States, and is taken by Iron and Steel Man-ufacturers, Machinists, Founders, Hardware Dealers and Tinners, Gunsmiths, Plumbers, Coulery Manufac-turers, File Manufacturers, Saw Manufacturers, Boiler Manufacturers, and by Leading Railway Officials. It advocates protection to AMERICAN MANUFACTURES. Its Markets are full and reliable. Able Correspond-ents traveling in the West and South. Manufacturing Items are a leading feature. Its manufacturing items are copied by the press throughout the country.

Only \$4.00 per Annum. If you are in the Metal Trade, take a Metal Paper. It will save you more than its cost. If you are a manufacturer, take the journal that advocates your interests. Don't patronize Free Trade journals, but help those

ral hand to further Free Trade. Expend some of yours to favor Protection.

If you advertise which is the best medium? Circulation being equal, which would you patronize—a Free Trade journal or a Protection journal? Circulation is considered the value of an advertising medium. Much depends on the character of the circulation. The New York Weekly Tribune claims 200,000 circulation, and gets from two to five dollars per line for advertising. The Irox World reaches more people engaged in the metal business than the New York Tribune. Our rates are about ten cents per line. Which will pay the best?
